

Eastman Housing Authority

Employment Survey and Registration

Section 3

The Housing Authority of the City of Eastman, Georgia (EHA) is committed to helping the residents of its communities achieve their goals of self-sufficiency by providing opportunities for training and employment. EHA provides employment opportunities on construction projects by encouraging its contractor to hire qualified residents of EHA communities, connecting residents to job training and placement activities, and providing program coordination that facilitates economic opportunities for residents. EHA also provides employment opportunities by hiring qualified residents of EHA communities for available EHA positions.

Section 3 of the Housing and Urban Development Act of 1968, as amended by the Housing and Community Development Act of 1994, requires that, to the greatest extent feasible, employment and other economic opportunities generated by HUD fund be directed to low and very low income residents. To this end, EHA will implement efforts to have a ready pool of public housing residents to fill the positions offered by the EHA, its contractors, or subcontractors.

To accomplish this goal, the EHA is conducting a resident Survey and Registration. A copy of this survey is available at the EHA Administrative Office. EHA encourages any residents seeking employment to complete this survey and return it to the EHA Administrative office located at 824 Griffin Ave.
